

Key Stage 2 Language Centre Home Learning

2nd October 2020

English

This week we have reflecting on our time in Forest School, each boy described what they did at Forest school and how they felt there, which was listed on the board. The boys used the Out and about Poem to inspire them to write their own poem about Forest school. They were Amazing! We then started our research on endangered animals, their passion for animals shown through. Please help them research why the Tiger, Polar Bear, Porpoise and white tiger are endangered so they can complete their posters next week.

Spellings

This week we have revised the nk and ng sound at the end of words, after a vowel. Here are some words to practise (including some common exception words that don't follow the double letter rule!). We will test these on Monday!

Bank think honk sunk wink bunk sing string hang long

(challenge words) **singer reader builder painter children**

Maths

This week we have been securing or knowledge of the place value of numbers to 20, 100 and 1000. They used 100 beads strings and place value cards to support their partition of number and ordering in size order. They are going to revisit The analogue clock and digital times so practice over the week end what time they wake up, the time they had lunch, dinner and even bed time so they get lots of practice.

Remember to login to Mathletics to practice their number work.

Topic

This week we learned about the Trojan War and how Homer recorded the first version they experienced different versions of the story but were able to spot the common stories between the three.

They wrote their own version of the story. Can they tell you how the Greek tricked the Trojans so they could win the war?

Science

This week the boys really enjoyed investigating the strength of magnets. Flying the Kit with magnets was tricky to measure but making a paperclip chain on magnets helped them to compare which was the strongest. Their favourite was see how many pages they needed before the magnet could not pick up the paperclip.

Visit BBC bitesize to explore the North and south pole of magnets to prepare for next week the link below.
