

MY GEOGRAPHY
PROJECT ABOUT
ANTARCTICA

Amazing facts about the Antarctic

- An icy continent in the South Pole.
- Antarctica is covered by frozen ground called Permafrost.
- It is 1.5 times larger than the USA.
- It is the worlds largest desert.
- Contains 60-90% of the worlds freshwater .
- Has about 87% of worlds ice.
- Antarctica used to be as warm as Melbourne.
- The most rapidly warming area on earth.

How many types of animals are there in the Antarctic?

- At least 235 marine species are found in both Antarctica and the Arctic, ranging in size from whales and birds to small marine snails, sea cucumbers, and mud-dwelling worms.

Antarctica pollution

A lot of the damaging impacts of pollution that are seen in Antarctica are due to pollution that is produced elsewhere but is transported to Antarctica.
